[28th Sept](#) & [29th Sept](#)

Mobile Forensics

- Name – KK Mookhey and Vikash
- **Smartphones:** The most prevalent business and personal computing and communication devices
- Money laundering, terrorism, financial fraud – all being transacted over smartphones
- Digital forensics techniques have evolved to cover these – yet tools remain costly
- **Focus:**
 - Necessity to build capability on these fronts
 - Develop open-source tools to aid the process
 - Set legal precedent to accept this evidence as well
 - Expand to other areas of forensics
- **Impact:** Private sector, government, national cyber defense
